DETAILED ACTION

Response to Amendment

1. Examiner acknowledges the amendments made on the claims filed on April 7, 2005. Claims 14 and 15 have been cancelled.

Allowable Subject Matter

2. **Claims 1-13** are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 4, 8, 9 and 12, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest the limitations having a camera having a function for printing a captured image with the use of an external printing function wherein a clock generating means generates clocks having different operating frequencies for the control means, as between when the printing processing is executed and when the image-capturing means obtains an image.

Sakai, US Patent 5,206,730 discloses an image-capturing apparatus (Fig. 1) having a plurality of operation modes, comprising: control means (Fig. 1: 13) for controlling the operation of the entire image-capturing apparatus; and frequency changing means (Fig. 1: 14) for changing the operating frequency of the control means according to an operation mode (Col. 3, line 7 – col. 4, line 29). However, Sakai fails to teach or reasonably suggest the camera having a function for printing a captured image with the use of an external printing function wherein a clock generating means generates clocks having different operating frequencies for the control means, as

between when the printing processing is executed and when the image-capturing means obtains an image.
